THE POWER STONE ™

DESCRIPTION

The Power Stone® is a call-activated AC power controller for rebooting and powering up/down off-site computers and other devices by phone.

The Power Stone passively monitors the phone line and does not actively "interface" with any equipment connected to the phone line.

The feature-rich power controller offers you a wide variety of operating modes to fit your specific application. Control power to connected equipment "Automatically" using one of three Automatic Operating Modes. Or control power "Passively" until you call in and input your security access code to direct functions using touch tone commands.

POPULAR APPLICATIONS

- PC Lock-ups
- Network Systems
- Sales Terminals
- Monitoring Systems
- ATMs
- Telecommuting
- Phone Systems
- Terminal Adapters
- Channel Banks
- Home Security
- Lighting
- Power Status

Your Price only $129.00 Delivered*
